

NASA Exoplanet Archive

Provides:

This API provides...
data from the NASA Exoplanet Archive.

Key Provisioning:

Pain factor (0=ezy...5=nightmare): 

- Does not require key for data access, but limits requests per minute if no key is obtained
- By creating an account, features such as saving the data table settings and filters is accessible

Quotas:

- default value is 1,000 requests per hour

The Good:

- No key necessary
- Very descriptive user guide
- Allows to query in several different formats

The Bad:

- The documentation is quite cluttered and difficult to read

The Ugly:

- default table of exoplanets is in a csv format, which is very difficult to read
